ABOUT JOHNSON HARDWOOD

Johnson Hardwood is one of the leading manufacturers of premium hardwood flooring with distribution to the United States and Canada. We produce on-trend, high-demand flooring options by sourcing durable hardwood species from around the globe. Our products are recognized for their affordability and superior quality. Plus, we offer the highest standards of worry-free floors in the industry being CARB II and Lacey Act compliant. Each flooring plank is precision milled, hand crafted, and hand stained to produce an exquisite product. Johnson Hardwood floors are manufactured with the greatest care and backed by a warranty that assures complete satisfaction.

The Johnson Hardwood manufacturing process starts by sourcing wood species with grain patterns that flooring customers are looking for. Color and wood specie trends are researched by our product development team to create natural looking premium hardwood flooring options for our customers. From contemporary to traditional and dark wood to natural colors, we keep our customer interior design needs in mind by providing a wide variety of flooring options.

Whether exotic or domestic, Johnson Hardwood travels the globe in search of unique grain patterns, durable woods, and responsibly harvested trees. Harvested wood is cut into planks and hand carved for a custom floor look. Wood planks are then hand stained to ensure even coloring while allowing the natural wood color variation to come through. The finished product has the look of a custom hardwood floor while at an affordable price. Johnson Hardwood adheres to anti-dumping and sustainable tree harvesting practices with a commitment to preserving forest ecosystems.

OUR COMMITMENT TO SUSTAINABILITY

Johnson Hardwood produces high quality, on-trend flooring that is selectively harvested from countries all around the world. Whether lumber is harvested from our own forestlands, or sourced from our supply partners, Johnson Hardwood is committed to supporting Sustainable Forestry Practices. Which means that we are dedicated to preserving healthy forest ecosystems, did you know that:

- 30 to 40% of our exotic lumber comes from aged or fallen timbers. Aging trees block the sunlight, and therefore limit the growth of younger, oxygen producing trees.
- Approximately 70% of our product line is engineered in construction. As compared to solids, this gives Johnson Hardwood a four to five times better yield on our valuable lumber.
- Our commitment to sustainable forestry practices that encompass not only the trees, but also the entire forest ecosystem.
- We employ a comprehensive supplier certification program for all sourced lumber. This helps to insure that our suppliers demonstrate their commitment to environmentally conscious timber procurement.
- We generate much of our steam/electricity requirements by burning our recycled wood scraps reducing our carbon footprint.
- We process 100% of our recovered sawdust into highly efficient heating pellets that are used by the local communities.
- Being a California based company, we strictly adhere to all local and state guidelines regarding waste disposal, recycling, building efficiency improvements, and proper fuel/chemical storage procedures.

Yes, we make beautiful floors, but did you know:

- The adhesive used in our engineered floors meets the stringent German E-1 standard for Formaldehyde emissions
- We use only water based finishes on all of our products.
- Johnson Hardwood engineered products are available, on a special order basis, with a core adhesive which meets the criteria for LEED IEQ 4.4, Low Emitting Materials.
- Johnson Hardwood realizes that environmental stewardship is our responsibility as a manufacturer, and is an ongoing process that continually needs to be improved upon.

ENGINEERED and SOLID HARDWOOD PRODUCT LINES

An Overview of Johnson's Engineered/Solid

LACEY ACT FOR RESPONSIBLE FORESTRY & SUSTAINABILITY

Johnson Hardwood aims to assure our customers that the Johnson Hardwood floor they've purchased comes from responsibly harvested forests. Johnson Hardwood sources hardwood from the U.S., China, Brazil, and Canada. Government regulations in all of these countries have become much more stringent over the last decade, and we fully support their efforts to protect their forests. China's Council for International Cooperation on Environment and Development regulates sustainable development through environmental policy and reform. There are Six National Key Forest Programs regulated by China's State Council that include the promotion of economic development, natural resource management and environmental protection, taxation and regulation of timber markets, and international trade and investment. To comply with global sustainability, Brazil adheres to forest certification as regulated by the Forest Stewardship Council. Canada's forest and lumber industry is regulated by the Canada Environmental Protection Agency. The United States, through the enactment of the Lacey Act, has helped other countries by preventing the importation of any hardwood product that is not legally harvested according to the rules of its country of origin. The Lacey Act requires end users of endangered wood to certify the legality of their supply chain all the way to the trees. If an importer knowingly imports tainted wood that has been illegally cut down for lumber then they will be raided by the Environmental Investigation Agency and dealt with by the U.S. Department of Justice.

CARB CERTIFIED FOR QUALITY ASSURANCE

It is part of the Johnson Hardwood manufacturing process to carefully craft and comply with the most stringent wood manufacturing regulations imposed in the United States. The most stringent standard being CARB compliant according to the California Environmental Protection Agency. CARB refers to the California Air Resources Board as governed by the California Environmental Protection Agency. CARB's mission is to promote and protect public health, welfare, and ecological resources through effective reduction of air pollution. Since January 1, 2009, manufacturers of wood products are required to prove their products meet the established Airborne Toxic Control Measure (ATCM) that sets upper limits on formaldehyde emissions from composite wood products sold in California, and is the most stringent due to the emission caps where other standards are based on averages. To be compliant, Johnson Hardwood is required to provide documentation of compliance and label products accordingly. CARB II, effective January 1, 2011, has defined guidelines for the entire production process that includes the manufacturer, distributor and fabricator of wood products.

EMISSIONS STANDARDS FOR ENGINEERED WOOD PRODUCTS

Johnson Hardwood is dedicated to producing the highest quality wood products through sustainable and environmentally responsible practices. As part of this commitment, we ensure all our applicable products are certified under the Environmental Protection Agency's (EPA) regulations, including: hardwood plywood, composite panels, and particle board.

As of June 1, 2018, all composite wood products must be compliant with the EPA's Toxic Substance Control Act (TSCA) Title VI regulation. This certification and our compliance statements are also included all product packaging. The EPA established Title VI of TSCA to regulate the chemical emissions produced by three important composite wood products: hardwood plywood, medium-density fiberboard (MDF), and particle board. Read on to learn about Timber Products' compliance with the latest EPA regulations and industry best practices.

INTRODUCING

The SAGA VILLA Series

American Maple... Ultra-Modern Sophistication.

Engineered
Hardwood

The Saga Villa Series features soft-grain American maple skillfully crafted and triple hand-stained to produce unique depth of color to each individual plank. There are nine colors total ranging from chic light browns to trendy taupes that can easily be matched to modern furniture. Each plank is up to six feet in length, producing a long, fluid look; and, is random sawn, adding character to your flooring. From modern homes to luxury beach houses, the Saga Villa Series is the perfect floor to living in sophistication and style.

TSCA Title VI Compliant - emission standards for adhesives in composite wood products.	
COLOR & STYLE	
Style: Modern, trendy, goes well with modern furniture.	
Colors: 9 colors ranging from light browns to taupes.	

INTRODUCING

The GRAND CHATEAU Series

European Oak... Ultra-Modern Style and Flare.

Engineered
Hardwood

Encapsulating the sophistication and style of Europe, Johnson Hardwood's Grand Chateau Series ushers in a clean and simple elegance to any space. Sourcing from European Oak enables both wider and longer planks. While a modern, clean look and feel is obtained by simply relying on the wood grains' natural complexity and aesthetics – in turn complementing today's on-trend looks. Soft and unembellished taupes and richly detailed natural tans are achieved by mild whitewashing and administering a multi-hand-staining process. Crafted in random lengths and offered in 12 exquisite shades all evoking a modern simplicity, Johnson Hardwood will have you settling into your space with elegance and poise.

INTRODUCING

The GREEN MOUNTAIN Series

Bringing the Majesty of the Mountains In.

Solid
Hardwood

The Green Mountain Series is a high-end, traditional solid hardwood collection made completely from legally harvested domestic wood species in North America. With lightly wire-brushed oaks and lightly handscraped maples, this collection brings natural American beauty into your home. As a solid hardwood flooring line, these floors can withstand multiple sandings and are good for raised foundation installation. With a total of 12 colors, the Green Mountain Series reflects the range of timbered hillsides and flowing streams of the wild country, transforming your home into a picturesque setting.

The Go Anywhere Floor

Natural Wood

No Pattern Repeats

- Real Wood Veneer
- WaterShield Rigid Core Construction
- Sound Control Premium Underlayment

With the advantages of both real wood and luxury vinyl, Johnson Hardwood proudly introduces its newest in innovation and technology, a waterproof wood floor. The Reservoir Series uses a natural hardwood wear layer providing distinct details such as open grains and no repetition in patterns for each plank. Resistance to moisture, pet stains, and routine water spills can be achieved from top down and bottom up within a 72-hour period with our patented WaterShield Rigid Core technology. FloorScore certified, formaldehyde and phthalate free, and pre-attached Sound Control Premium underlayment makes our Reservoir Series the ideal solution for families who are looking for a real wood floor without the worries.

Our craftsmen have delicately scraped and hand honed this floor to resemble the look of Old English Pubs where friends, family and travelers gathered to relax and converse in a warm and inviting atmosphere. The long 7 foot planks give the look of times gone by.

We used a character grade maple to bring out the natural beauty of the wood grain, along with filled splits and knots for more of that old world look.

- All Natural Wood
- Long-Length Planks
- 11 Step Aluminum Oxide

The Alehouse series puts emphasis on the details to create a totally unique flooring experience. A multi-layer, hand-staining process has been used to create an inner glow effect that darkens towards the timeworn plank edges. Due to the natural glow, the Alehouse series has high color variation. Our exclusive vintage surface treatment finish adds even more character for the look of a reclaimed, custom hardwood floor.

Handscraped

- Handcrafted
- Multiple Widths
- 11 Step Aluminum Oxide

The Tuscan series is designed to replicate the nostalgic presence of handcrafted wood floors in the regions of Northern Italy. The multiple widths are unique to match each cut of the wood to give every plank its own personal character, managing to bind it all together. Only through years of craftsmanship and the hands of artisan experience, this wood floor can truly harness the essence of old world Tuscany.

The British Isles Series offers the look and feel of a timeworn, natural oil finished floor but with the ease of maintenance of a traditional urethane finished floor.

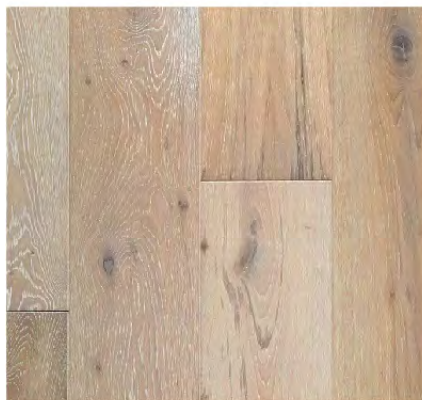

Wide width, long lengths and inclusions of knots and mineral streaks all add to the beauty of this floor. With a mix of classic and trend setting colors, British Isles blends well with all decors.

SOLID HARDWOOD

Bevel Edge

Filled Checks

Hand Rubbed with Multi-Stain

- Handscraped
- Solid Wood
- 11 Step Aluminum Oxide

The Renaissance Series is a line dedicated to the craft of sculpting hardwood floors like generations ago. We offer this product line in only solid construction to bring out the depth of our scraping style.

Each solid Oak and Maple floor is hand rubbed with a multi-stain process for greater depth and clarity of colors.
